TECHNOLOGY NAME

CIVNET

Cross-Vendor Intelligent Defense Governance & Authenticated Command Orchestration

EXECUTIVE OVERVIEW

CIVNET is a proprietary technology asset developed by CIVITERA GovTech Inc. to address important challenges and opportunities within its target markets. The technology is designed to create measurable value through improved performance, enhanced efficiency, greater scalability, stronger resilience, and long-term operational benefits across commercial, industrial, governmental, and strategic environments.

CIVNET addresses a structural challenge in defense and critical-infrastructure operations: when systems from multiple independent vendors must act together under strict legal and operational constraints, no unified governance framework exists to arbitrate conflicting recommendations into a single, legally-validated, authenticated, and fully traceable course of action. CIVNET provides cross-vendor governance engineered for accountability and auditability at every step, positioning CIVITERA at the command-orchestration foundation of multi-vendor defense ecosystems.

CIVITERA believes CIVNET represents a strategically important innovation platform with significant commercial, industrial, and licensing potential.
