GSMLACS™

Global Sovereign Multi-Layer AI Control System

Patent Pending at USPTO · Filed 2026 · CIVITERA GovTech Inc.

TECHNOLOGY NAME

GSMLACS™

Global Sovereign Multi-Layer AI Control System

EXECUTIVE OVERVIEW

GSMLACS™ is a proprietary technology asset developed by CIVITERA GovTech Inc. to address important challenges and opportunities within its target markets. The technology is designed to create measurable value through improved performance, enhanced efficiency, greater scalability, stronger resilience, and long-term operational benefits across commercial, industrial, governmental, and strategic environments.

GSMLACS™ addresses the central challenge of trustworthy autonomous systems: the absence of a unified, sovereign-grade control architecture capable of governing safety, ethics, and accountability across autonomous infrastructure at scale. As global regulatory frameworks impose auditable oversight on high-risk AI systems, GSMLACS™ embeds compliance, ethical evaluation, and resilient autonomy directly into the control substrate, positioning CIVITERA at the governance and orchestration layer of the sovereign autonomous-systems economy.

CIVITERA believes GSMLACS™ represents a strategically important innovation platform with significant commercial, industrial, and licensing potential.
